This letter is to seek correction on a piece of data on WISEdata that is incorrect pertaining to a single student's dropout status. This student is showing up in WISEdata as a "yes" in the dropout indicator column; however, has transferred to be a homeschool student. This issue was brought to the attention with case number CRM:00600001442. The issue was not resolved at the time of the December snapshot.

We have verified in our SIS that the transfer information has been entered correctly, however did not pull correctly to WISEdata. We are looking for this issue to be resolved.
